

PROMANAGE — Panduan Implementasi UI Flutter

Dokumen ini memecah tampilan web PROMANAGE (React/Tailwind) menjadi bagian-bagian spesifik yang harus diubah/dibuat di Flutter agar tampilannya **sama persis**.

BAGIAN 1 — Design System & Tema

1.1 Color Palette

Warna utama yang digunakan di seluruh aplikasi:

```
dart

// lib/core/theme/app_colors.dart

class AppColors {
  // Primary — Merah tua (brand utama)
  static const Color primary      = Color(0xFF991B1B); // red-800 Tailwind
  static const Color primaryDark  = Color(0xFF7F1D1D); // red-900 (hover state)
  static const Color primaryLight = Color(0xFFFEF2F2); // red-50 (background i

  // Background
  static const Color background  = Color(0xFFF9FAFB); // gray-50
  static const Color surface     = Color(0xFFFFFFFF); // white (card)

  // Border & Divider
  static const Color border      = Color(0xFFF3F4F6); // gray-100
  static const Color borderInput = Color(0xFFD1D5DB); // gray-300

  // Text
  static const Color textPrimary  = Color(0xFF111827); // gray-900
  static const Color textSecondary = Color(0xFF4B5563); // gray-600
  static const Color textMuted    = Color(0xFF9CA3AF); // gray-400
  static const Color textLight    = Color(0xFF6B7280); // gray-500

  // Status Colors
  static const Color statusActive    = Color(0xFF166534); // green-800 text
  static const Color statusActiveBg  = Color(0xFFDCFCE7); // green-100 bg
  static const Color statusDone      = Color(0xFF1E40AF); // blue-800 text
  static const Color statusDoneBg    = Color(0xFFDBEAFE); // blue-100 bg
  static const Color statusPending   = Color(0xFF92400E); // yellow-800 text
  static const Color statusPendingBg = Color(0xFFFEF9C3); // yellow-100 bg

  // Accent per kategori / icon
  static const Color accentBlue      = Color(0xFF1E40AF); // blue-800
  static const Color accentBlueBg    = Color(0xFFEFF6FF); // blue-50
  static const Color accentGreen     = Color(0xFF166534); // green-800
  static const Color accentGreenBg   = Color(0xFFD9F9D9); // green-50
  static const Color accentYellow    = Color(0xFF92400E); // yellow-800
  static const Color accentYellowBg  = Color(0xFFFFFBE8); // yellow-50
}
```

1.2 Typography

```
dart
```

```
// lib/core/theme/app_text_styles.dart

class AppTextStyles {
  static const String fontFamily = 'Inter'; // atau System default sans-serif

  // Headings
  static const TextStyle h1 = TextStyle(
    fontSize: 30, fontWeight: FontWeight.w700, color: AppColors.textPrimary,
    height: 1.2,
  );
  static const TextStyle h2 = TextStyle(
    fontSize: 24, fontWeight: FontWeight.w700, color: AppColors.textPrimary,
  );
  static const TextStyle h3 = TextStyle(
    fontSize: 18, fontWeight: FontWeight.w700, color: AppColors.textPrimary,
  );

  // Body
  static const TextStyle bodyLarge = TextStyle(
    fontSize: 16, fontWeight: FontWeight.w400, color: AppColors.textSecondary,
    height: 1.6,
  );
  static const TextStyle bodySmall = TextStyle(
    fontSize: 14, fontWeight: FontWeight.w400, color: AppColors.textSecondary,
  );
  static const TextStyle caption = TextStyle(
    fontSize: 12, fontWeight: FontWeight.w400, color: AppColors.textMuted,
  );

  // Label / Badge
  static const TextStyle labelSmall = TextStyle(
    fontSize: 12, fontWeight: FontWeight.w700, letterSpacing: 0.5,
  );
  static const TextStyle labelMedium = TextStyle(
    fontSize: 14, fontWeight: FontWeight.w500, color: AppColors.textPrimary,
  );
}

```

1.3 Border Radius & Shadow

```
dart

// lib/core/theme/app_theme.dart

class AppTheme {
  // Border Radius
  static const double radiusSm = 8.0; // rounded-lg (input, badge kecil)
  static const double radiusMd = 12.0; // rounded-xl (card, dropdown)
  static const double radiusLg = 16.0; // rounded-2xl (card utama, modal)

  // Shadow (untuk card/modal)
  static final BoxShadow shadowSm = BoxShadow(
    color: Colors.black.withOpacity(0.06),
    blurRadius: 4, offset: const Offset(0, 1),
  );
  static final BoxShadow shadowMd = BoxShadow(
    color: Colors.black.withOpacity(0.08),
    blurRadius: 12, offset: const Offset(0, 4),
  );
  static final BoxShadow shadowPrimary = BoxShadow(
    color: AppColors.primary.withOpacity(0.20),
    blurRadius: 16, offset: const Offset(0, 4),
  );
}

```

 BAGIAN 2 — Navigation / Header (AppBar)

Referensi: `src/app/components/Header.tsx`

Header di web adalah sticky top navbar dengan logo, navigasi, dan user dropdown. Di Flutter, implementasikan sebagai custom AppBar + BottomNavigationBar untuk mobile.

2.1 AppBar Flutter

```
dart
// lib/widgets/app_header.dart

AppBar buildAppBar(BuildContext context) {
  return AppBar(
    backgroundColor: Colors.white,
    elevation: 0,
    shadowColor: AppColors.border,
    surfaceTintColor: Colors.transparent,
    bottom: PreferredSize(
      preferredSize: const Size.fromHeight(1),
      child: Divider(height: 1, color: AppColors.border),
    ),
    title: Row(
      children: [
        // Logo - kotak merah dengan ikon folder
        Container(
          width: 36, height: 36,
          decoration: BoxDecoration(
            color: AppColors.primary,
            borderRadius: BorderRadius.circular(AppTheme.radiusSm),
          ),
          child: const Icon(Icons.folder_copy_rounded, color: Colors.white, size: 24),
        ),
        const SizedBox(width: 10),
        Text('ProManage', style: AppTextStyles.h3.copyWith(
          fontSize: 20, color: AppColors.textPrimary,
        )),
      ],
    ),
    actions: [
      // Jika user belum login → tombol "Masuk"
      // Jika sudah login → avatar circle + nama + dropdown
      _buildUserButton(context),
    ],
  );
}
```

2.2 Navigasi (Menu)

Halaman yang tersedia:

Web Route	Flutter Screen
<code>/</code>	<code>HomeScreen</code>
<code>/dashboard</code>	<code>DashboardScreen</code>
<code>/projects</code>	<code>ProjectManagementScreen</code>
<code>/about</code>	<code>AboutUsScreen</code>
<code>/project/:id</code>	<code>ProjectDetailScreen</code>
<code>/project/:id/work/:id</code>	<code>WorkDetailScreen</code>

Di mobile, gunakan **BottomNavigationBar** untuk 4 menu utama + **GoRouter** atau **Navigator** untuk navigasi push ke detail.

```
dart

BottomNavigationBar(
  selectedItemColor: AppColors.primary,
  unselectedItemColor: AppColors.textMuted,
  backgroundColor: Colors.white,
  type: BottomNavigationBarType.fixed,
  items: const [
    BottomNavigationBarItem(icon: Icon(Icons.home_outlined), label: 'Beranda'),
    BottomNavigationBarItem(icon: Icon(Icons.dashboard_outlined), label: 'Dashb
    BottomNavigationBarItem(icon: Icon(Icons.folder_outlined), label: 'Proyek')
    BottomNavigationBarItem(icon: Icon(Icons.info_outline), label: 'Tentang'),
  ],
)
```

🏠 BAGIAN 3 — Home Screen

Referensi: [src/app/pages/Home.tsx](#)

Terdiri dari 3 section: **Hero**, **Features**, **CTA Banner** + **Footer**.

3.1 Hero Section

```
| Manajemen Proyek |
| Mahasiswa        | [Foto tim] |
| — teks deskripsi — |
| [Mulai Sekarang →] |
```

```
dart

// Widget Hero
Column(
  crossAxisAlignment: CrossAxisAlignment.start,
  children: [
    Text('Manajemen Proyek', style: AppTextStyles.h1),
    Text('Mahasiswa', style: AppTextStyles.h1.copyWith(color: AppColors.primary)),
    const SizedBox(height: 16),
    Text('Platform kolaborasi yang memudahkan...', style: AppTextStyles.bodyLar),
    const SizedBox(height: 24),
    // Gambar hero (aspect ratio 4:3)
    ClipRect(
      borderRadius: BorderRadius.circular(AppTheme.radiusLg),
      child: AspectRatio(aspectRatio: 4/3, child: Image.network(url, fit: BoxFit
    ),
    const SizedBox(height: 24),
    ElevatedButton.icon(
      onPressed: () {},
      icon: const Icon(Icons.arrow_forward, size: 16),
      label: const Text('Mulai Sekarang'),
      style: ElevatedButton.styleFrom(
        backgroundColor: AppColors.primary,
        foregroundColor: Colors.white,
        padding: const EdgeInsets.symmetric(horizontal: 24, vertical: 14),
        shape: RoundedRectangleBorder(borderRadius: BorderRadius.circular(AppTh
      ),
    ),
  ],
)
```

3.2 Feature Cards (5 fitur)

Layout: Grid 1 kolom di mobile, 2 kolom di tablet.

Setiap card:

```
dart
Container(
  padding: const EdgeInsets.all(20),
  decoration: BoxDecoration(
    color: Colors.white,
    borderRadius: BorderRadius.circular(AppTheme.radiusMd),
    border: Border.all(color: AppColors.border),
    boxShadow: [AppTheme.shadowSm],
  ),
  child: Column(
    crossAxisAlignment: CrossAxisAlignment.start,
    children: [
      // Icon box merah
      Container(
        width: 48, height: 48,
        decoration: BoxDecoration(
          color: AppColors.primary,
          borderRadius: BorderRadius.circular(AppTheme.radiusSm),
        ),
        child: Icon(featureIcon, color: Colors.white, size: 24),
      ),
      const SizedBox(height: 16),
      Text(featureTitle, style: AppTextStyles.h3),
      const SizedBox(height: 8),
      Text(featureDesc, style: AppTextStyles.bodySmall),
    ],
  ),
)
```

5 fitur dengan icon:

Fitur	Icon Flutter
Profil Proyek	<code>Icons.folder_copy_outlined</code>
Pekerjaan dalam Proyek	<code>Icons.check_box_outlined</code>
Perencanaan Aktivitas	<code>Icons.calendar_today_outlined</code>
Pemantauan Realisasi	<code>Icons.bar_chart_rounded</code>
Penutupan Proyek	<code>Icons.lock_outline</code>

3.3 CTA Banner

```
dart
```

```

Container(
  width: double.infinity,
  padding: const EdgeInsets.symmetric(vertical: 48, horizontal: 24),
  color: AppColors.primary,
  child: Column(
    children: [
      Text('Siap Mengelola Proyek Anda?',
        style: AppTextStyles.h2.copyWith(color: Colors.white),
        textAlign: TextAlign.center,
      ),
      const SizedBox(height: 12),
      Text('Bergabunglah dan mulai kelola proyek...',
        style: AppTextStyles.bodyLarge.copyWith(color: Color(0xFFCA5A5)), // r
        textAlign: TextAlign.center,
      ),
      const SizedBox(height: 24),
      OutlinedButton.icon(
        onPressed: () {},
        icon: const Icon(Icons.arrow_forward, size: 16),
        label: const Text('Mulai Sekarang'),
        style: OutlinedButton.styleFrom(
          foregroundColor: AppColors.primary,
          backgroundColor: Colors.white,
          side: BorderSide.none,
          padding: const EdgeInsets.symmetric(horizontal: 24, vertical: 14),
        ),
      ),
    ],
  ),
)

```

BAGIAN 4 — Dashboard Screen

Referensi: `src/app/pages/Dashboard.tsx`

4.1 Stats Cards (4 kotak statistik)

Layout: 2×2 grid di mobile.

dart

```

GridView.count(
  crossAxisCount: 2,
  crossAxisSpacing: 12,
  mainAxisSpacing: 12,
  childAspectRatio: 1.3,
  shrinkWrap: true,
  children: [
    _buildStatCard('Total Proyek', totalProjects, Icons.work_outline, AppColors
    _buildStatCard('Pekerjaan', totalWorks, Icons.assignment_outlined, AppColor
    _buildStatCard('Aktivitas Selesai', doneActivities, Icons.check_circle_outl
    _buildStatCard('Total Progress', '${percent}%', Icons.track_changes_outline
      showProgress: true, progressValue: percent / 100),
  ],
)

Widget _buildStatCard(String label, dynamic value, IconData icon, Color bgColor
{bool showProgress = false, double progressValue = 0}) {
  return Container(
    padding: const EdgeInsets.all(16),
    decoration: BoxDecoration(
      color: Colors.white,
      borderRadius: BorderRadius.circular(AppTheme.radiusLg),
      border: Border.all(color: AppColors.border),
    ),
    child: Column(
      crossAxisAlignment: CrossAxisAlignment.start,
      children: [
        Row(mainAxisAlignment: MainAxisAlignment.spaceBetween, children: [
          Container(
            width: 40, height: 40,
            decoration: BoxDecoration(color: bgColor, borderRadius: BorderRadiu
            child: Icon(icon, color: iconColor, size: 20),
          ),
          Text(label, style: AppTextStyles.caption),
        ]),
        const SizedBox(height: 12),
        Text('$value', style: AppTextStyles.h2),
        if (showProgress) ...[
          const SizedBox(height: 6),
          LinearProgressIndicator(
            value: progressValue,
            backgroundColor: AppColors.border,
            color: Colors.amber,
            borderRadius: BorderRadius.circular(4),
          ),
        ],
      ],
    ),
  );
}

```

4.2 Chart Section

Gunakan package `fl_chart` atau `syncfusion_flutter_charts`.

Pie Chart — Status Portofolio:

dart

```
// Warna: ['#991b1b', '#1e40af', '#ca8a04', '#166534']
PieChart(
  PieChartData(
    sectionsSpace: 4,
    centerSpaceRadius: 50,
    sections: statusData.map((item) => PieChartSectionData(
      value: item.value.toDouble(),
      color: item.color,
      radius: 70,
      title: '',
    )),
  ).toList(),
),
)
```

Bar Chart — Distribusi Kategori:

```
dart

BarChart(
  BarChartData(
    barGroups: categoryData.map((item) => BarChartGroupData(
      x: item.index,
      barRods: [BarChartRodData(
        toY: item.count.toDouble(),
        color: AppColors.primary,
        width: 32,
        borderRadius: const BorderRadius.vertical(top: Radius.circular(4)),
      )],
    )),
  ).toList(),
  gridData: FlGridData(drawVerticalLine: false),
  borderData: FlBorderData(show: false),
),
)
```

4.3 Tabel Progress Proyek

```
dart
```

```

Container(
  decoration: BoxDecoration(
    color: Colors.white,
    borderRadius: BorderRadius.circular(AppTheme.radiusLg),
    border: Border.all(color: AppColors.border),
  ),
  child: Column(children: [
    // Header tabel
    Padding(
      padding: const EdgeInsets.symmetric(horizontal: 20, vertical: 16),
      child: Row(mainAxisAlignment: MainAxisAlignment.spaceBetween, children: [
        Text('Detail Progress Proyek', style: AppTextStyles.h3),
        Icon(Icons.access_time, color: AppColors.textMuted),
      ]),
    ),
    Divider(height: 1, color: AppColors.border),
    // List item proyek
    ListView.separated(
      shrinkWrap: true,
      physics: const NeverScrollableScrollPhysics(),
      itemCount: projects.length,
      separatorBuilder: (_, __) => Divider(height: 1, color: AppColors.border),
      itemBuilder: (context, i) {
        final project = projects[i];
        return Padding(
          padding: const EdgeInsets.symmetric(horizontal: 20, vertical: 14),
          child: Row(children: [
            // Nama proyek
            Expanded(child: Text(project.name, style: AppTextStyles.labelMedium)),
            // Badge status
            _buildStatusBadge(project.status),
            const SizedBox(width: 16),
            // Progress bar + persen
            SizedBox(width: 100, child: Column(children: [
              LinearProgressIndicator(
                value: project.progress / 100,
                backgroundColor: AppColors.border,
                color: AppColors.primary,
                borderRadius: BorderRadius.circular(4),
                minHeight: 6,
              ),
              const SizedBox(height: 2),
              Text('${project.progress}%', style: AppTextStyles.caption.copyWith(
                fontWeight: FontWeight.w700, color: AppColors.textPrimary)),
            ])),
            // Tombol download PDF
            IconButton(
              icon: Icon(Icons.download_outlined, color: AppColors.textMuted),
              onPressed: () {},
            ),
          ]),
        );
      },
    ),
  ]),
)

```

BAGIAN 5 — Project Management Screen

Referensi: `src/app/pages/ProjectManagement.tsx`

5.1 Search Bar + Tombol Tambah

dart

```

Row(children: [
  Expanded(
    child: Container(
      decoration: BoxDecoration(
        color: Colors.white,
        borderRadius: BorderRadius.circular(AppTheme.radiusSm),
        border: Border.all(color: AppColors.border),
      ),
      child: TextField(
        decoration: InputDecoration(
          hintText: 'Cari proyek...',
          hintStyle: AppTextStyles.bodySmall.copyWith(color: AppColors.textMute),
          prefixIcon: Icon(Icons.search, color: AppColors.textMuted),
          border: InputBorder.none,
          contentPadding: const EdgeInsets.symmetric(horizontal: 16, vertical:
        ),
      ),
    ),
  ),
  const SizedBox(width: 12),
  ElevatedButton.icon(
    onPressed: () => showCreateProjectModal(context),
    icon: const Icon(Icons.add, size: 18),
    label: const Text('Buat Proyek'),
    style: ElevatedButton.styleFrom(
      backgroundColor: AppColors.primary,
      foregroundColor: Colors.white,
      padding: const EdgeInsets.symmetric(horizontal: 16, vertical: 12),
      shape: RoundedRectangleBorder(borderRadius: BorderRadius.circular(AppThem
    ),
  ),
])

```

5.2 Project Card

[Folder Icon]	Nama Proyek	[i]
	Badge	Status
📍 Lokasi	📅 Tgl Mulai - Selesai	
👤 Pelaksana		
Progress		67%
	12 aktivitas selesai dari 18	
[Lihat Detail →]	📄 Excel	📄 PDF

dart

```

Container(
  margin: const EdgeInsets.only(bottom: 12),
  decoration: BoxDecoration(
    color: Colors.white,
    borderRadius: BorderRadius.circular(AppTheme.radiusLg),
    border: Border.all(color: AppColors.border),
    boxShadow: [AppTheme.shadowSm],
  ),
  child: Column(children: [
    // Header card
    Padding(
      padding: const EdgeInsets.all(16),
      child: Row(children: [
        Container(
          width: 44, height: 44,
          decoration: BoxDecoration(color: AppColors.primaryLight, borderRadius
            child: Icon(Icons.folder_copy_rounded, color: AppColors.primary, size
          ),
          const SizedBox(width: 12),
          Expanded(child: Column(crossAxisAlignment: CrossAxisAlignment.start, ch
            Text(project.name, style: AppTextStyles.labelMedium),
            const SizedBox(height: 4),
            _buildStatusBadge(project.status),
          )),
          PopupMenuButton(/* Rename & Delete */),
        ],
      ),
    ),
    Divider(height: 1, color: AppColors.border),
    // Meta info
    Padding(
      padding: const EdgeInsets.all(16),
      child: Column(children: [
        _buildInfoRow(Icons.location_on_outlined, project.location),
        const SizedBox(height: 6),
        _buildInfoRow(Icons.calendar_today_outlined, '${project.startDate} - ${
        const SizedBox(height: 6),
        _buildInfoRow(Icons.person_outline, project.executor),
      ]),
    ),
    // Progress bar
    Padding(
      padding: const EdgeInsets.symmetric(horizontal: 16),
      child: Column(crossAxisAlignment: CrossAxisAlignment.start, children: [
        Row(mainAxisAlignment: MainAxisAlignment.spaceBetween, children: [
          Text('Progress', style: AppTextStyles.caption),
          Text('${project.progress}%', style: AppTextStyles.caption.copyWith(
            fontWeight: FontWeight.w700, color: AppColors.textPrimary)),
        ]),
        const SizedBox(height: 6),
        LinearProgressIndicator(
          value: project.progress / 100,
          backgroundColor: AppColors.border,
          color: AppColors.primary,
          minHeight: 6,
          borderRadius: BorderRadius.circular(3),
        ),
        const SizedBox(height: 4),
        Text('${project.doneActivities} aktivitas selesai dari ${project.totalA
          style: AppTextStyles.caption),
      ]),
    ),
    // Action buttons
    Padding(
      padding: const EdgeInsets.all(16),
      child: Row(children: [
        Expanded(

```

```

        child: OutlinedButton.icon(
          onPressed: () => navigateToProjectDetail(project.id),
          icon: const Icon(Icons.arrow_forward, size: 16),
          label: const Text('Lihat Detail'),
          style: OutlinedButton.styleFrom(
            foregroundColor: AppColors.primary,
            side: BorderSide(color: AppColors.primaryLight),
          ),
        ),
      ),
      IconButton(icon: Icon(Icons.table_chart_outlined, color: AppColors.text),
        IconButton(icon: Icon(Icons.picture_as_pdf_outlined, color: AppColors.t
      ]),
    ),
  ]),
)

```

5.3 Modal Buat Proyek — 3-Step Wizard

Modal ini memiliki 3 langkah dengan step indicator di atas:

Step Indicator:

```

dart
Row(children: [
  for (int i = 1; i <= 3; i++) ...[
    _buildStepCircle(i, currentStep),
    if (i < 3) Expanded(child: Divider(
      color: currentStep > i ? AppColors.primary : AppColors.border,
      thickness: 2,
    )),
  ],
])

Widget _buildStepCircle(int step, int currentStep) {
  final isActive = step == currentStep;
  final isDone = step < currentStep;
  return Container(
    width: 32, height: 32,
    decoration: BoxDecoration(
      shape: BoxShape.circle,
      color: isActive || isDone ? AppColors.primary : Colors.white,
      border: Border.all(
        color: isActive || isDone ? AppColors.primary : AppColors.borderInput,
        width: 2,
      ),
    ),
  ),
  child: Center(
    child: isDone
      ? const Icon(Icons.check, color: Colors.white, size: 16)
      : Text('$step', style: TextStyle(
        color: isActive ? Colors.white : AppColors.textMuted,
        fontWeight: FontWeight.w700,
      )),
  ),
);
}

```

Step 1 — Data Proyek (field: Nama, Deskripsi, Lokasi, Tanggal Mulai, Tanggal Selesai, Pelaksana, Supervisor)

Step 2 — Tambah Pekerjaan (field: Nama, Deskripsi, Tempat, Kategori [dropdown], Tanggal, Pelaksana, Supervisor)

Step 3 — Tambah Aktivitas per pekerjaan (field: Nama Aktivitas, Waktu Pelaksanaan, Pelaksana)

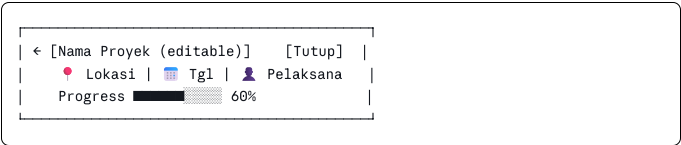

Form Field Style (konsisten di semua step):

```
dart
TextFormField(
  decoration: InputDecoration(
    labelText: 'Nama Proyek *',
    labelStyle: AppTextStyles.bodySmall.copyWith(color: AppColors.textSecondary),
    hintText: 'Masukkan nama proyek',
    hintStyle: AppTextStyles.bodySmall.copyWith(color: AppColors.textMuted),
    contentPadding: const EdgeInsets.symmetric(horizontal: 16, vertical: 12),
    border: OutlineInputBorder(
      borderRadius: BorderRadius.circular(AppTheme.radiusSm),
      borderSide: BorderSide(color: AppColors.borderInput),
    ),
    focusedBorder: OutlineInputBorder(
      borderRadius: BorderRadius.circular(AppTheme.radiusSm),
      borderSide: BorderSide(color: AppColors.primary, width: 2),
    ),
  ),
)
```

 BAGIAN 6 — Project Detail Screen

Referensi: `src/app/pages/ProjectDetail.tsx`

6.1 Header Proyek

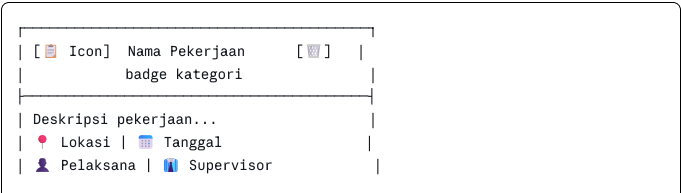

6.2 Tab Bar — Kategori Pekerjaan

3 tab kategori:

```
dart
TabBar(
  labelColor: AppColors.primary,
  unselectedLabelColor: AppColors.textSecondary,
  indicatorColor: AppColors.primary,
  indicatorWeight: 2,
  tabs: const [
    Tab(text: 'Intelligence Engineering'),
    Tab(text: 'Intelligence Creation'),
    Tab(text: 'Implementation'),
  ],
)
```

6.3 Work Card (per pekerjaan dalam tab)

6.4 Badge Kategori

```
dart
Widget _buildCategoryBadge(String category) {
  final configs = {
    'engineering': { 'label': 'Engineering', 'bg': Color(0xFFDBEAFE), 'text':
    'creation': { 'label': 'Creation', 'bg': Color(0xFFDCFCF7), 'text':
    'implementation': { 'label': 'Implementation', 'bg': Color(0xFFFEF9C3), 'text'
  };
  final config = configs[category]!;
  return Container(
    padding: const EdgeInsets.symmetric(horizontal: 10, vertical: 4),
    decoration: BoxDecoration(
      color: config['bg'] as Color,
      borderRadius: BorderRadius.circular(20),
    ),
    child: Text(config['label'] as String,
      style: AppTextStyles.labelSmall.copyWith(color: config['text'] as Color))
  );
}
```

6.5 Tombol Tutup Proyek

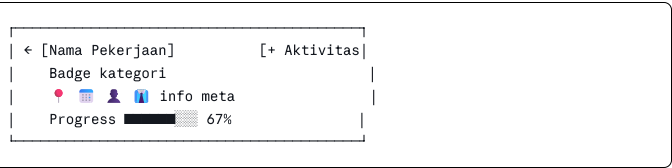

```
dart
OutlinedButton.icon(
  onPressed: () => showCloseConfirmDialog(context),
  icon: Icon(Icons.lock_outline, size: 16, color: AppColors.primary),
  label: Text('Tutup Proyek', style: TextStyle(color: AppColors.primary)),
  style: OutlinedButton.styleFrom(
    side: BorderSide(color: AppColors.primary),
    shape: RoundedRectangleBorder(borderRadius: BorderRadius.circular(AppTheme.
  )),
)
```

⚙ BAGIAN 7 — Work Detail Screen

Referensi: `src/app/pages/WorkDetail.tsx`

Halaman paling kompleks. Terdiri dari 2 bagian utama dengan tab:

7.1 Header Work

7.2 Tab: Perencanaan / Monitoring

```
dart
```

```
DefaultTabController(
  length: 2,
  child: Column(children: [
    TabBar(
      tabs: const [
        Tab(text: 'Perencanaan Aktivitas'),
        Tab(text: 'Monitoring Realisasi'),
      ],
      labelColor: AppColors.primary,
      indicatorColor: AppColors.primary,
    ),
    TabBarView(children: [
      _buildPlanningTab(),
      _buildMonitoringTab(),
    ]),
  ]),
)
```

7.3 Activity Card (Perencanaan)

```
| o/v Nama Aktivitas [🗑] |
| 🕒 Waktu | 👤 Pelaksana |
| [Lihat Foto/File] |
```

Status done/belum:

```
dart

GestureDetector(
  onTap: () => toggleActivityDone(activity.id),
  child: Container(
    width: 28, height: 28,
    decoration: BoxDecoration(
      shape: BoxShape.circle,
      color: activity.done ? AppColors.primary : Colors.transparent,
      border: Border.all(
        color: activity.done ? AppColors.primary : AppColors.borderInput,
        width: 2,
      ),
    ),
  ),
  child: activity.done
    ? const Icon(Icons.check, color: Colors.white, size: 16)
    : null,
),
)
```

7.4 Activity Card (Monitoring)

Menampilkan evaluasi dan rencana tambahan:

```
| ✓ Nama Aktivitas [✏ Edit] |
| Evaluasi: teks evaluasi... |
| Rencana Tambahan: teks rencana... |
| [File 1] [File 2] [+ Foto] |
```

BAGIAN 8 — Komponen Reusable

8.1 Status Badge

```
dart
Widget buildStatusBadge(String status) {
  final styles = {
    'Aktif':    {'bg': Color(0xFFDCFCF7), 'text': Color(0xFF166534)},
    'Selesai': {'bg': Color(0xFFDBEAFE), 'text': Color(0xFF1E40AF)},
    'Tertunda': {'bg': Color(0xFFFEF9C3), 'text': Color(0xFF92400E)},
  };
  final s = styles[status] ?? {'bg': AppColors.border, 'text': AppColors.textMuted};
  return Container(
    padding: const EdgeInsets.symmetric(horizontal: 10, vertical: 4),
    decoration: BoxDecoration(
      color: s['bg'] as Color,
      borderRadius: BorderRadius.circular(20),
    ),
    child: Text(status, style: AppTextStyles.labelSmall.copyWith(color: s['text']),
  );
}
```

8.2 Info Row (ikon + teks)

```
dart
Widget buildInfoRow(IconData icon, String text) {
  return Row(children: [
    Icon(icon, size: 14, color: AppColors.textMuted),
    const SizedBox(width: 6),
    Expanded(child: Text(text, style: AppTextStyles.caption, overflow: TextOverflow.ellipsis)),
  ]);
}
```

8.3 Loading State

```
dart
// Spinner merah + teks
Column(
  mainAxisAlignment: MainAxisAlignment.center,
  children: [
    CircularProgressIndicator(
      color: AppColors.primary,
      strokeWidth: 3,
    ),
    const SizedBox(height: 16),
    Text('Memuat data...', style: AppTextStyles.bodySmall),
  ],
)
```

8.4 Empty State

```
dart
```

```

Column(
  mainAxisAlignment: MainAxisAlignment.center,
  children: [
    Container(
      width: 64, height: 64,
      decoration: BoxDecoration(color: AppColors.border, borderRadius: BorderRa
      child: Icon(Icons.folder_off_outlined, size: 32, color: AppColors.textMut
    ),
    const SizedBox(height: 16),
    Text('Belum ada proyek', style: AppTextStyles.h3),
    const SizedBox(height: 8),
    Text('Buat proyek pertama Anda', style: AppTextStyles.bodySmall),
  ],
)

```

8.5 Modal/ Bottom Sheet Style

Di web, modal menggunakan overlay centered dialog. Di Flutter, gunakan

`showModalBottomSheet` (mobile feel) atau `showDialog` dengan styling:

```

dart
showDialog(
  context: context,
  builder: (_) => Dialog(
    shape: RoundedRectangleBorder(borderRadius: BorderRadius.circular(AppTheme.
    child: Container(
      constraints: const BoxConstraints(maxWidth: 480),
      padding: const EdgeInsets.all(24),
      child: modalContent,
    ),
  ),
)

```

🔒 BAGIAN 9 — Login Modal

Referensi: `src/app/components/LoginModal.tsx`

9.1 Struktur

```

| [X] Masuk ke ProManage |
| Teks sambutan          |
| [Tab: MASUK] [Tab: DAFTAR] |
| NIM [input]            |
| Password [input 🔒]    |
| [ MASUK ] < tombol merah penuh |

```

Header logo di modal:

```

dart

```

```

Row(children: [
  Container(
    width: 40, height: 40,
    decoration: BoxDecoration(color: AppColors.primary, borderRadius: BorderRadius.circular(20)),
    child: const Icon(Icons.folder_copy_rounded, color: Colors.white, size: 20)
  ),
  const SizedBox(width: 12),
  Column(crossAxisAlignment: CrossAxisAlignment.start, children: [
    Text('Masuk ke ProManage', style: AppTextStyles.h3),
    Text('Kelola proyek Anda dengan mudah', style: AppTextStyles.caption),
  ]),
]),
])

```

📦 BAGIAN 10 — Dependencies Flutter yang Dibutuhkan

Tambahkan ke `pubspec.yaml`:

```

yaml
dependencies:
  flutter:
    sdk: flutter

  # State Management
  provider: ^6.1.0          # atau riverpod / bloc sesuai preferensi

  # HTTP & API
  http: ^1.2.0
  dio: ^5.4.0

  # Routing
  go_router: ^14.0.0

  # Charts (untuk Dashboard)
  fl_chart: ^0.68.0

  # Toast / Snackbar (pengganti sonner)
  fluttertoast: ^8.2.4

  # File picker (untuk upload file di WorkDetail)
  file_picker: ^8.0.0

  # Image (untuk foto aktivitas)
  image_picker: ^1.0.7

  # PDF / Excel download
  open_file: ^3.3.2
  path_provider: ^2.1.2

  # Local storage (untuk draft wizard)
  shared_preferences: ^2.2.3

```

📁 BAGIAN 11 — Struktur Folder Flutter yang Disarankan

```

lib/
├── core/

```

✅ CHECKLIST IMPLEMENTASI

Centang setiap bagian saat sudah selesai:

- ☐ **Design System** — warna, tipografi, radius, shadow
- ☐ **AppBar** — logo, navigasi, user dropdown
- ☐ **BottomNavigationBar** — 4 tab navigasi
- ☐ **Home Screen** — Hero, 5 Feature Cards, CTA Banner, Footer
- ☐ **Dashboard Screen** — 4 stat cards, 2 chart, tabel progress
- ☐ **Project Management Screen** — search bar, project cards list, modal wizard 3-step
- ☐ **Project Detail Screen** — header proyek, tab kategori, work cards
- ☐ **Work Detail Screen** — tab perencanaan/monitoring, activity cards, upload file
- ☐ **Login Modal** — tab masuk/daftar, form field
- ☐ **Status Badge** component
- ☐ **Loading & Empty State** component
- ☐ **API Service** — connect ke Django backend (`(http://[SERVER]:8000/api/)`)

Dokumen ini dibuat berdasarkan source code PROMANAGE versi web (React + Tailwind CSS) untuk referensi implementasi Flutter.
